# Welcome

## Pot Plants 2019

In our latest catalogue for pot plants and asters we once again feature several new and exciting varieties. In Cyclamen we have expanded the colour range of the mini SeeWhy series. Additionally, two new fringed mixes have been added among the midi and large flowered types. Finally, our poinsettia assortment has been updated with new colours and varieties with improved plant habits.

Our full range of pot plants includes several genera and species and in all of them we are confident we have a competitive and innovative offer for you and your customers.

With the support of our technical team we are delighted to be able to bring our genetics to you and help you to have a successful growing season.

Best wishes  
Syngenta Flowers® Team

A close-up photograph of a white plastic seedling tray filled with young plants. The plants have small, rounded, green leaves with prominent white veins. The tray is filled with many such plants, and the focus is sharp on the ones in the foreground, with others blurred in the background.

If you are looking for the finest range of mini, midi and maxi cyclamen, make us your one-stop-shop. Our carefully chosen range has been selected from the world's best breeders allowing you to make an informed choice of the best varieties for you and your customers. We take great pride in our cyclamen range so that you can maximise your sales potential with regular customers and impulse purchasers.

The choice is yours...

Ahead of their time

**SeeWhy®**  
Mini Cyclamen

## How you benefit

**SeeWhy®** lets you plan and produce more efficiently and saves time, money and effort.  
Worry-free production – that's our promise.

### Developing early – up to 7-10 days faster plant bulking

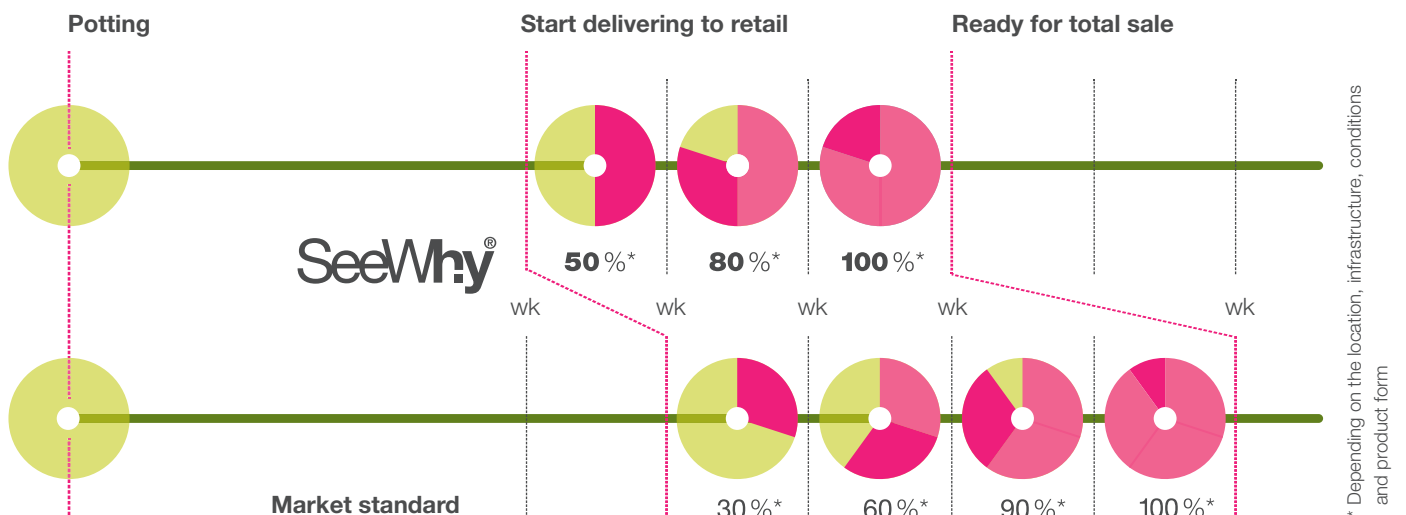

- + Worry-free production with our early cyclamen

### Developing compactly – perfect harmony between flowers and plant

- + Stays compact even in full bloom

### Developing uniformly – high uniformity within 3 weeks

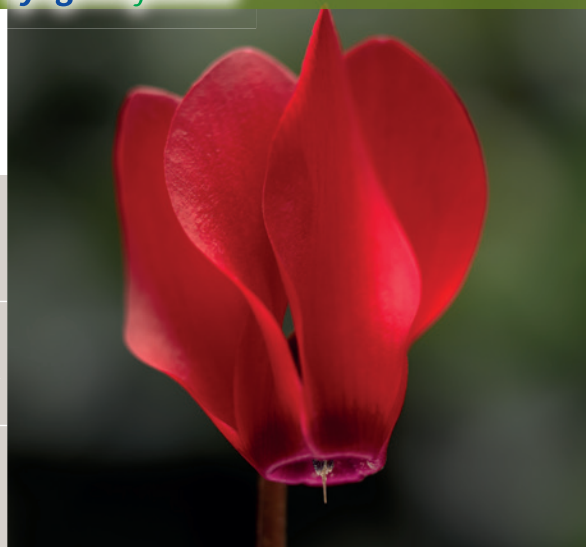

- + Aligned flowering windows within and between colours

**SeeWhy®****Mini**

- Mini cyclamen for summer and autumn
- Small flowers and leaves
- Round habit
- Excellent performance in greenhouse
- Earliest and most uniform series in this segment

Sierra • Perfetto • Laser • Midori

# Synchro Cyclamen

## Top uniformity

- Top uniformity in habit
- Top uniformity in earliness
- Easiest crop planning

## Positioning of the Synchro Cyclamen series

### Midori

- Heat tolerance makes the plants easier to grow in summer and early autumn
- Compact plants so more plants per m<sup>2</sup>
- Many small leaves means lots of flowers

### Laser

- The Synchro selection produces the best range for uniformity in earliness and plant habit
- Choice of 11 different matching colours for optimum flexibility
- More open plant habit limits problems with Botrytis

### Perfetto

- Earliest large flowering series on the market
- Best suited for efficient production
- Large flowers
- Suitable for mass market production

### Sierra

- Very early, allowing growers to sell up to 2 weeks earlier than competition
- Largest choice of 13 colours of which 10 Synchro colours
- Sierra Synchro selection produces the most uniform series in terms of earliness and plant habit

# MultiColours

The indoor use of combination plantings is gaining in popularity, both in the home (for example in living rooms and kitchens) and for instant decoration in public buildings (interior planting). Consumers are spending less and less time on choosing or looking after plants, so we need to make it easier for them by offering ready-to-use solutions.

Last year we introduced our MultiColours range for time-poor consumers. The MultiColours range has always featured a broad selection of bedding plants which have been proven in trials. We are now happy to announce the introduction of a range of MultiColours cyclamen that are great for indoor use, providing an instant decorative impact in consumers' living rooms, kitchens or elsewhere.

MultiColours combinations are easily produced and provide consumers with a good shelf life and great benefits such as their ability to flower all season long. All combinations are tested for their performance during production, transportation, on the shop floor and in the consumer environment. Using MultiColours allows you to extend your offer with something unique for your customers.

## Advantages of MultiColours

### For growers

- Tried and trusted formulas
- Only well-known genetics are used in MultiColours
- Uniform combinations in terms of habit and earliness
- Three single plugs or cuttings for the best results
- Single plugs mean greater efficiency thanks to a higher percentage of saleable plants and less grading
- POS material available to support sales

### For retailers

- Great-looking plants which sell themselves
- Superb sales appeal with all colours clearly visible at point-of-sale – ideal for impulse purchases
- Excellent shelf life – healthy plants extend the selling season

### For end customer

- Enjoy abundant flowering all season long
- Easy to care for
- Great for instant decoration in living rooms and kitchens

**Are you excited by the MultiColours concept? Would you like to know more about our complete MultiColours range? Then please speak to your local representative about the options.**

## Syngenta Flowers® Cyclamen in Xtray®

A reliable supply of healthy, high quality cyclamen young plants is crucial for every partner in the supply chain. All Syngenta Flowers® cyclamen young plants are supplied in the Xtray®. This innovative reusable tray has proven itself in the industry and set the standard in the market.

Cyclamen young plants are available in XT72, XT128 and XT264 formats, depending on the segment.

### Xtray® 72

The biggest plug available, specially designed for premium quality young plants in combination with a short cropping time.

### Xtray® 128

The medium sized young plant plug, which is specially recommended for mini and medium cyclamen.

### Xtray® 264

The smallest young plant plug available and, for many growers, just right for starting larger scale production. All 264 trays are delivered as glue plugs which protect the fine roots and aid transplanting.

[illegible]

# Capsicum & Solanum

Pot plants with the 'wow' factor! Neat compact ranges to suit modern consumers tastes. These beautiful plants all display their eye-catching fruits above healthy, glossy foliage. Great pot plants which bring a touch of style to 21st century living.

# Other Pot Plants

## from Seed

Heat and humidity loving Pentas is the perfect spring bedding crop for warm climates and is also appreciated as a summer season extending patio and garden plant in more temperate regions.

The compact BeeBright series is designed for high density production in 10.5-13 cm pots. It is more uniform, more compact, better branched and earlier blooming than commercial varieties on the market today. Larger flower umbels held above the foliage also provide greater colour impact at retail and on the patio.

Pentas lanceolata F1

## BeeBright Violet

## BeeBright

- Uniformly compact, well branched plants
- Flowering up to 7 days earlier than competing series
- Uniform flowering across the series
- Flowers held above the foliage
- for cultivation as annual bedding or pot plants from seed

# Poinsettia

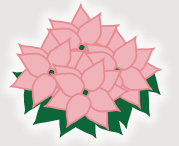

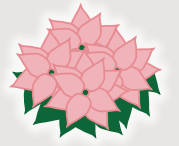

We pride ourselves on the quality and range of our poinsettias, with an assortment to suit all requirements. Consumers love these seasonal pot plants and we have a variety to suit every household and lifestyle. Poinsettia Vega is an early, high-density variety with a pronounced V shape, making it easy to sleeve and transport and preventing potential damage. The bright red colour and attractive cyathia make it an interesting alternative for the early market. Vega can be grown in 10.5 - 15 cm pots with a reaction time of 7 - 7.5 weeks.

Low PGR need

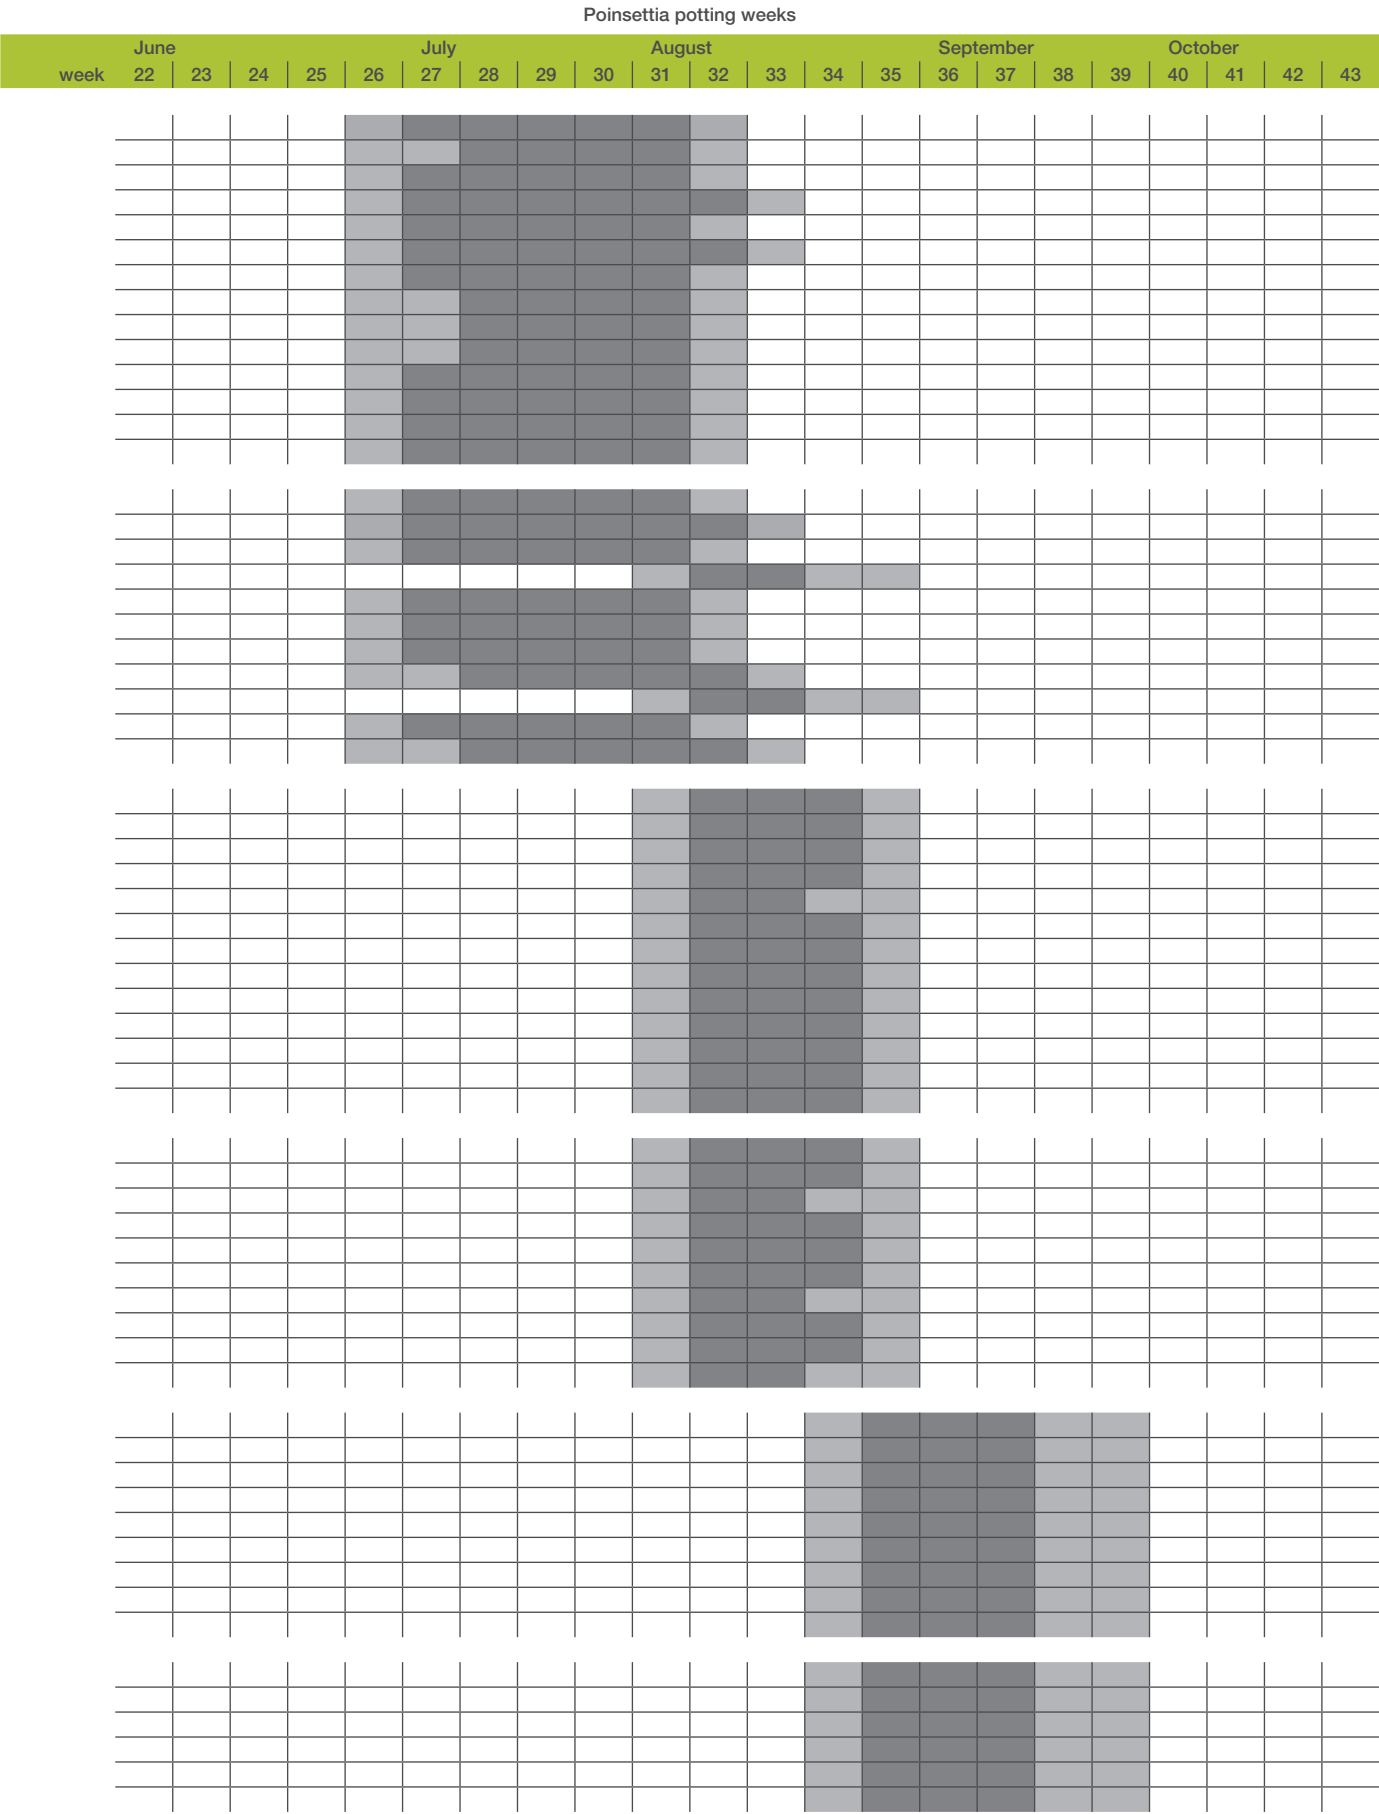

Standard PGR needs

High PGR needs

Our extensive, top-quality range of poinsettias offers you the greatest flexibility in growing and marketing these desirable pot plants. Our choice of varieties, pot sizes, plant habit and temperature requirements allow you to maximise consumer interest and your selling season. The selection we offer includes recent award winners to ensure you offer first-rate new varieties that will appeal to your customers.

## Titan

### Reliable producer

- V-shaped habit and strong root system
- Reliable variety - high percentage sellable plants
- Early flowering
- Easy to sleeve
- Extremely good shelf life
- Titan white rated 'Best Shelf Life' at LTO Groei service in 2015

## Sigma

### High density

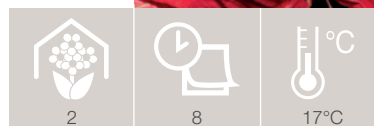

- Compact variety
- Very low PGR demand
- Very good branching
- For small pots, upright growing

## Magma

### Reliable compact producer

- Very little use of PGR needed
- V-shaped habit and strong root system
- Reliable variety – high percentage of sellable plants
- Easy to sleeve
- Good shelf life

## Neva

### Variety for high-density cultivation

- Marked V-shaped habit
- Suitable for high density
- Easy to sleeve

## Sonora® White Glitter

### Eye-catching colour

- Upright growth habit
- Mainly for Midi and Mini production
- Unique dark red glitter type

## Cortez®

### Attractive plant form

- Perfect bracts held above the leaves
- Very uniform growth habit
- Exceptionally long shelf life
- Special colours: Electric Fire and Burgundy

## Whitestar

### Clear White

- Large clear white bracts

## Cinnamon Star

### Speciality

- Unique apricot to cinnamon colour
- Bracts stay well above the foliage

## Early Millenium®

### Earliest to flower

- Upright growth habit
- Heat tolerant
- Extremely strong root system

## Syngenta Flowers® Poinsettias

Proven and established product forms! As well as using first-class varieties, choosing the appropriate product form is essential for successful cultivation. Syngenta Flowers® offers personalised solutions that meet individual requirements.

### URC (100)

All unrooted cuttings are shipped straight from our southern mother stock facilities. These healthy cuttings are characterised by consistently high uniformity and quality. A special profile for mini poinsettias is available on request.

### Jiffy/Paperpot (100)

High-quality, reliable young plants are your guarantee for a good start and a perfectly shaped, finished plant. They are offered in jiffy or paper pots, depending on the region where they are to be sold. Proven over the years and always a good choice!

### Quickstep® (100)

The original Quickstep® 100 is produced at our own mother stock facilities. Coming in a 2 cm paper pot it is very easy to transplant.

# Aster

Our two Aster novi-belgii series Magic and Henry I, are great for autumn flowering, producing masses of blooms over a long period. The separate colours are easy to force or can be grown with the natural flowering period.
